# Introduction

This is our refreshed Corporate Parenting Plan for 2021-2023. It builds on previous successes of our 2017-2020 plan and continues to address identified areas for further improvement.

## How we developed this plan

This plan has been through an iterative development process in which our priorities have been shaped by all of the following:

- Our previous 2017-2020 plan our successes in this plan and areas where we needed to continue to deliver improvement objectives.
- The findings of an evaluation of our 2017-2020 plan and of our entire approach to Corporate Parenting, reported to the Corporate Parenting Group in early 2020.
- Findings from engagement with our looked-after and care-experienced children and young people; and parents and carers.
- **The Promise** findings of the programme of work led by the Care Review commissioned by our First Minister that involved listening carefully to over 5.5 thousand experiences with over half of those voices belonging to care experienced people.
- Data on our looked-after and care-experienced children and young people.
- The impact of the Covid-19 pandemic and the challenges and pressures that this has brought.

Our self-evaluation findings led to our identification of the following initial priority aims, listed in our 2020-2023 Children's Services Plan:

- In Dumfries and Galloway, we fully understand and deliver our duties as corporate parents; and have high aspirations for our looked-after and care-experienced children and young people.
- Looked-after and care-experienced children and young people will have improved access to all the services they need.
- Care-experienced children and young people have improved educational attainment outcomes in line with Dumfries and Galloway expectations.
- Procedures, policies, strategy and services are shaped in line with the views of children and young people.

However, while identifying these initial priority aims, we were awaiting the findings of the <u>Independent Care Review</u> on its 3-year programme of listening to those with experience of living and working in and around the care system. The findings of the review were published in February 2020, with <u>The Promise</u> being one of the key outputs. The Promise reflects what the review was told by the children, young people and adults who took part in the review and is built on the following Five Foundations:

The Promise is built on Five Foundations

- 1. Voice when children speak, adults must really listen to them. Adults must make sure that children are included in decisions about their lives.
- 2. Family if children are living with their family and are safe and feel loved, they should stay there. Their family should be given all the help they need to stay together. If they need extra help when things get difficult, they should get it.
- **3.** Care if children cannot stay with the adults in their family, they will stay with their brothers and sisters. The home they live in together will be a place where they feel safe and loved. It should be their home for as long as they want and need it to be.
- 4. **People** Relationships are important. Adults must make sure children are able to stay close to the people they want to and keep in contact with them. Adults must also help children make new relationships as they grow up. Sometimes adults need some help too. The adults who are close to children must get the help they need to make sure they can do their best for children.
- **5.** Scaffolding Help and support must be there for children and families whenever they need it. It must also be there for the adults who are close to children and families. It is important everyone knows where to go for help and that it is ready when it is asked for.

Following publication of The Promise, we reviewed and revised our priority aims and actions to ensure that the five foundations of The Promise are at the heart of this refreshed Corporate Parenting Plan. Our plan now has the following priorities, each one underpinned by a set of corporate parenting pledges:

- Housing and accommodation
- Interaction with young people
- Raising attainment
- Improving access to health

This has required us to consider how we reform our approach to corporate parenting. This involves looking at the potential for a redesign of current services, and the establishment of new services, based on meeting the needs of those we serve, rather than the needs of our systems. Service re-design and developments will be underpinned by a focus on early intervention and prevention, and by embedding a practice and culture change programme.

Our Corporate Parents and everyone involved have the commitment and vision 'to give all children and young people – **who are the experts in their lives** – influence and shape the services which are being provided for them to make sure they get the right help at the right time'.

Being a corporate parent means providing secure, nurturing and positive experiences for children and young people in our care wherever they live. Where a child or young person cannot safely stay at home, it is up to us to provide them with the care, support and stability that they deserve.

As corporate parents, we have a shared responsibility to support our children and young people, and we should have the same aspirations for our looked-after children and young people as we would have for children of our own. Our partners have come together as a Corporate Parenting Group. This plan will be shared with Listen2Us youth advocacy group and has been endorsed by our Elected Member Young Peoples' Champion and the Youth Councils Care Experienced Youth Council and Co-Chair of the Champions Board. Listen2Us will have regular opportunities to contribute to the agenda and work of the Corporate Parenting Group throughout the period of this plan.

#### We all consider:

#### What if this were my child?

Each young person within our care is unique and will require support specifically to meet their needs and allow them to reach their full potential. It is important to recognise this individually and the need for tailored services.

In Dumfries and Galloway, we are committed to listening to the young people and children who are, or have been, in our care so that we can ensure that their needs are at the centre of everything that we do. It is important that we value the experiences of each young person within our care and so the actions outlined within our plans have been developed in consultation with our young people.

We will also work with parents and carers, not only helping them achieve but ensuring they grow, develop and contribute to our local communities.

This plan outlines our position and aims with regard to corporate parenting and includes our corporate parenting action plans. Our Corporate Parenting Plan sits within our Children's Services Plan under Priority 2 'We will improve the wellbeing and life chances of our most vulnerable children and young people'.

We will produce an annual report on this plan and provide clear information about our performance and progress on our action plans – what has been achieved and what we need to do to make more progress. Needs and circumstances change, we will provide a mid-term review of this plan to address this. We will take account of progress to date and feedback from our children, young people, families, parents and carers.

Stephen Morgan Senior Manager, Corporate Parenting Group Chair Children and Families Service January, 2021

# **Dumfries and Galloway Corporate Parenting Pledges**

All partners share a commitment to creating opportunities that ensure that our children and young people in our care are encouraged to reach their full potential by empowering them and promoting positive outcomes. This plan sets out how we plan to further improve the services offered within Dumfries and Galloway, both for the children currently in our care and for our care experienced young people.

This plan is underpinned by our Corporate Parenting Pledges that will steer the work of our Corporate Parenting Group -

### **Corporate Parenting Pledges –**

Housing and Accommodation

- We will be confident that our services are as effective as they can be when they are shaped by the voices of children, young people and care leavers.
- We will ensure that all transitions from birth to young adulthood will be well planned and children and care leavers will experience safe, secure and stable placements, with as few moves as possible and to avoid homelessness and prevent homeless presentations.
- We will work with all young people who require accommodation to access and sustain the accommodation they choose and is available to meet their needs when they need it most.
- We will work with Housing providers to ensure there is a range of safe and comfortable accommodation choices to meet the needs of all young people at a time when they need this most for as long as they need this.
- We will ensure that a range of housing options will be available to vulnerable young people to access permanent accommodation options, or temporary accommodation if permanent is not immediately available, to meet their individual needs when they need this most to enable them to make a successful transition when they are ready to do so.

### Interaction with Young People

• We will ensure that our Looked After Children and Young People are given the same opportunities that any good parents would provide for their child, and that we have the same expectations and aspirations as we would for our own children.

#### **Raising Attainment Improvement Focus**

- We will develop and promote the role of Corporate Parents for raising academic attainment and promoting wider attainment and participation.
- We will contribute to Dumfries and Galloway's aspiration that young people will be in positive and sustained destination, and as part of the Young Person's Guarantee, support 100% of them to move into and sustain positive, meaningful destinations beyond school and be supported by appropriate training.
- We will improve the educational attainment of care experienced children by removing barriers to learning, improving tracking and monitoring, improving attendance, reducing exclusion and providing equal access to opportunities.
- We will develop, deliver and support intervention and prevention initiatives targeted at children and young people, aged between 0 26 to improve their wellbeing and attainment levels

#### Improving Access to Health

- We will be confident that all children and young people who are looked after are invited to a health assessment within 4 weeks of the initial request and have a clear understanding for the reasons of this assessment what this will look and feel like to them.
- We will ensure that each individual health assessments meet the individual needs of all children and young people.
- We will increase the uptake of appointments by ensuring that children, young people and families understand the value for them as well as remove any barriers.

This document outlines our vision, priorities and actions that are in place to support our children and young people. It is high level overview of the various activities that are currently ongoing. This is supported by detailed progress reports that are regularly reported, monitored and scrutinised by the Corporate Parenting Group.

# What do our looked after children and young people in Dumfries and Galloway say?

'I would like to have known more about my carers'

'Having a worker you actually have a good relationship with makes a difference, you don't feel stupid for asking them questions and you know they'll tell you as much as they are allowed to. Having a worker you don't trust makes everything so much worse cause you don't trust that they care at all' 'I would have liked if people spoke to me about things. To have known what was okay / what wasn't okay'

> 'It would be really good to get a profile or pack about where you're going before you go - some carers have really strong rules so it'd help for people to get ready and know what to expect'

'I didn't like that I was labelled under care'

> 'I went into care, but my cousins, brothers and sisters were allowed to stay at home... It made me feel like I was the person who had done something wrong when I hadn't'

'I was only 4 when I got taken into care so it wasn't ok to tell me what was happening at the time but no one has told me since. I was told I was going on holiday'

'I wish everyone had the experience I did, my social worker was there with me through everything and is someone I knew I could speak too' 'Wains taken into care as children should have someone speak to them when they're older rather than just not having answers. Care can make you feel alone' Stigma and stereotypes can be good or bad. Like, I've never had someone treat me badly or assume I'm the reason I'm not at home but having teachers and people look at you all sad is horrible. It's fake either way. I think people just want to be treated normally, not having someone down their throat or someone who looks like they're going to cry cause they feel sorry for you.

> I wish there was a way for people who left care straight away to change their minds. Some folk love it but I think I realised I wasn't ready and didn't really have a way to go back.

I'm 19 and really wanted to think things were different now for children and young people going into care but I don't think it's changed that much. We have all went into care years apart but we're all suggesting the same stuff as each other...I think it would be good to get the basics right. Cause you can only experience going into care properly once and if that's a bad experience then everything that comes after is tainted?

Me and my siblings were split up cause there were too many of us. We went from seeing each other every day, all the time to seeing each other once every 2 or 4 weeks in a council building that felt like the doctors waiting room. I'm glad I still got to see my siblings, but it's not the same as living with them. I was told we'd get 'regular contact' but i'm sorry, once or twice a month is nothing. If I told my social worker she could only see her kids twice a month she'd go mental. We were removed because bad things were happening at home to us, not because we did bad things to each other so it feels like you're being punished for something you've not done.

Corporate parenting is so weird to me. It's so awkward when folk act like your mum or dad when they don't know anything about you. I think for it to work, people need to be less corporate in how they actually speak to young people and just be a person - don't overpromise, be honest and actually have a laugh.

#### So, What is Happening Now?

#### Ongoing improvement work from our previous Corporate Parenting Plan

#### Our previous Plan delivered the following improvements in processes and service delivery

- Improvements in engagement we ensured that there are structures in place for care-experienced children and young people to give their views in their own case-planning, and also about the services that they use.
- We improved the way in which we respond to the health needs of looked-after children and young people, ensuring that health screening takes place in a timely fashion.
- In seeking to remove barriers to participation, we improved access to leisure and cultural activities for looked-after and careexperienced children and young people through our redesign and relaunch of the DG Access scheme.
- We developed supported housing options for young care-leavers, and the Common Allocation Policy was implemented by Homes 4 D&G (partnership between Dumfries and Galloway Council, DGHP, Cunninghame Housing Association, Irvine Housing Association and Home Group). In addition to this, Loreburn Housing Association have their Choice Based Lettings allocation policy prioritising Looked After Children who are referred by Dumfries and Galloway Council.
- We established a bespoke Care-Experienced Raising Attainment Group and a dedicated team whose main focus is to build capacity of the system to support children and young people.
- We greatly reduced the number of exclusions of looked-after children and agreed to work towards a zero target of exclusions.
- Our local Employment and Skills Partnership has worked together to develop a coordinated approach to employability services across our region and deliver the DG Youth Guarantee for young people up to age 24.

While we achieved the improvements above, in our 2017-2020 Corporate Parenting Plan, there were areas where we needed to continue to deliver improvement objectives in our new plan:

In our previous plan, our actions regarding accommodation were focused on the point at which young people left care, and the housing options available to them then. However, we identified that in our new plan, we needed to take a wider approach to 'accommodation' that encompassed all the placement options that children and young people could experience, with the aim of ensuring that all children and young people live in safe, secure and stable settings.

While we had set up structures for children and young people to give their views, and had carried out a range of engagement activities, we recognised that we needed to improve our whole approach to how we interact with children and young people.

We had put teams, structures and targets in place within Education to drive improvement in the attainment of our children and young people, but our data showed that our activities were yet to result in higher attainment, and we needed to continue to prioritise this improvement work in our 2021-2023 plan.

Over the course of our previous plan, we had steadily increased the percentage of health assessments carried out within the target timeframe. However, we needed to do more work to develop a better understanding of the overall health issues of our children and young people. We also had a particularly high rate of non-attendance at health assessments and we needed to understand the reasons for this, and to support children, young people and families to understand the value of them.

## Data on our children and young people

Each year, an Annual Report is submitted to the Corporate Parenting Group; and an analysis of this data supported our need to focus on the areas for improvement described above. In the Annual Report, data is provided on a set of key indicators, many of which are published annually by Scottish Government. These statistics allow us to review trend data over time; and they provide information on how we compare with Scotland as a whole, and with our 'comparator' authorities (Angus, Argyll and Bute, Highland, Moray, Scottish Borders).

From March 2020, the Covid-19 pandemic has had a major impact on the lives of our children, young people and families; but this is not yet reflected in national published Social Work statistics. The following section contains some key messages from our data, with information where available, on how the pandemic is impacting on these.

#### Numbers and rates of looked-after children in Dumfries and Galloway

Since 2013 (when our current reporting framework was established), Dumfries and Galloway has had higher rates of looked-after children (as a rate per 1000 of our under 18 population) than our comparator authorities, and our rate has been closer to that for Scotland as a whole. On 31 July 2019 we had 395 looked-after children and young people. This equated to a rate of 1.5 per 1000 of our population aged 0-17. In comparison, the rate per 1000 for our comparator authorities was 1.1 and the rate for Scotland was 1.4. During the Covid-19 pandemic, referrals to Social Work have increased, but these have not necessarily translated into higher numbers of looked-after children.

### The age profile of our looked-after children

In our most recent annual report with comparator data (for 2018-2019) our percentage of children aged under 5 had increased slightly over the previous year from 25% to 28%; and the percentage aged 16+ had fallen from 10% to 6% giving us a lower percentage of young people aged 16 and above than our comparators.

#### Where our children are looked after

Our reports show that since 2013, we have consistently had a higher proportion of children looked-after at home than our comparators and Scotland. In 2018-2019, 35% of our children and young people were looked after at home. In Scotland that year, 25% of children were looked after at home; and the average for our comparators was 26%. It is positive that children are looked after in a community setting, and all policy dictates that we should endeavour to keep children at home. However, <u>Data from the Scottish Government</u> shows that nationally, children looked after at home have lower educational attainment than those looked after away from home. We will address this through our continued prioritisation of educational attainment in our Raising Attainment action plan. Through our Housing and Accommodation action plan, we aim to ensure that fewer children and young people need to become looked-after; and that we have a range of different

placement options so that those who do need to become looked-after will have the most suitable placement to meet their needs.

#### **Number of placements**

We have succeeded in maintaining a low number of placement moves for children and young people. Data from 2019 shows that 6% of looked-after children had had 3 or more placements. This was the same as in 2018 and was in line with the national figure. However, the Covid-19 pandemic has put pressures on children, young people, families and on all aspects of the care system.

#### **Primary school Looked After Children attendance**

Prior to the pandemic, at primary stages there was no notable difference in attendance for looked-after pupils – 94.8% looked-after children compared with 95.1% non-looked after children in 2018-2019. Our latest data shows looked-after children's primary attendance at 94.42% in December 2020.

#### Secondary school Looked After Children attendance

At secondary stages, in 2018/2019 looked-after Children attendance was at 85.1% compared with 91.8% for non-looked after Children. Data from early 2020 showed a slight fall in attendance, and children looked-after at home with lower attendance than those looked-after away from home. Our latest data shows looked-after children's secondary attendance at 82.25% for the month of December 2020.

#### **Exclusions - Primary**

Prior to the pandemic, primary exclusions for looked after children had decreased significantly in 2018/2019. Latest data shows an exclusion rate of 12.42 for the month of December 2020.

#### **Exclusions – Secondary**

There had been a slight rise in the looked-after Children secondary exclusion rate in 2018/2019, however figures in early 2020 had shown a significant drop in the rate, with a particular reduction in the rate of exclusions for children looked-after at home. Latest data shows an exclusion rate of 26.5 for the month of December 2020.

#### Literacy and Numeracy – achievement of Level 4 Literacy and Numeracy on leaving school

Prior to the pandemic, our data for the year 2018-2019 showed that Dumfries and Galloway values for looked-after Children achieving Level 4 Literacy and Numeracy had improved on the previous 2 years – up to 52.4% in 2018-2019 - but were notably lower than comparator values. They were also significantly lower than the average value for all pupils in Dumfries and Galloway of 89.3%.

#### Attainment

In 2019, Dumfries and Galloway performed lower than our comparators and National Averages for looked-after Children leaving school by highest level of attainment at levels 3 to 7.

#### Secure Care

Very few of our children require Secure Care and numbers are too low to publish (fewer than 5 children and young people).

#### **Positive destinations**

The percentage of looked-after Children entering a positive destination in 2018/2019 fell to 66.67% (down from 82.35% in 2018). This is lower than that of our comparators and Scotland.

#### Health

The target for looked-after Children Health Assessments is that they should all be carried out within 28 days. In 2019, 80% were carried out within this 28-day timeframe. Latest data for January to December 2020 shows a slight fall to 77%. In seeking to achieve the target, a significant issue is the number of appointments that are not attended. The 'Did Not Attend' (DNA) rate for appointments has continued to be around 20% both prior to, and during the pandemic, even though the looked-after children's Health Team has tried to address this by using telephone and text reminders.

#### Homelessness

In 2019-2020 there were 20 homelessness applications from young people who had been looked-after by the local authority within the last 5 years.

#### **Participation from our Young People**

Dumfries and Galloway's Champions Board Project aims to provide personal development opportunities for young people aged 12-25 in their local communities, and a forum in which young people can advocate for and influence improved decision making by Corporate Parents with a goal for young people to become more confident, heard and connected. The project is managed by the Youth Work Service and young people's participation is voluntary. Key engagement figures from 2019/2020:

- 180+ weekly targeted youth work provisions were delivered in local communities (Newton Stewart, Stranraer, Castle Douglas, Dalbeattie, Sanquhar, Annan, Langholm, Lockerbie and Dumfries) and worked with 46 young people. These sessions included the delivery of informal youth work activities and workshops focussed on corporate parenting, rights and issues identified as relevant to those attending.
- 64 young people voted in the election for Dumfries and Galloway's Care Experienced Youth Councillor
- 14 young people attended and participated in 1 Champions Board Meeting
- 42 young people participated in the first #WeCare gathering which was co-designed with young people and delivered on site at Park Farm in the days leading up to Youth Beatz Festival. Young people from across Dumfries and Galloway attended to take part in the event which included workshops from the 1,000 Voices Team at Who Cares? Scotland, a partnership session with Police Scotland, Employability and Skills, Care Experienced Education Team and Youth Services; and a tour through the interactive youth led drama production, The Toon. Attendees included a combination of young people known and new to the project.
- 26 young people engaged with the Listen2Us advocacy project which led on the #WeCare planning, Individual Grants Scheme, Champions Board Meetings and Social Work student training. Listen2Us also worked alongside the Independent Care Review team to host an open day in Dumfries.

In 2018, Listen2Us led on a consultation which engaged with 98 Looked After young people and Care Leavers. The findings from this have since been used to inform the themes included within this Corporate Parenting Plan.

# **Corporate Parenting Group**

We know all of our children and young people are unique, with individual needs and circumstances. Through our Corporate Parenting Group, our Young Peoples Champion Board and other young people's forums together with our Elected Members, we work closely with our young people to understand their needs and ensure that their voice is at the centre of everything we do.

# The Five Foundations of The Promise will be at the heart of everything we do

To uphold the rights and secure the wellbeing of all looked-after children, young people and care-leavers through the development, delivery and monitoring of a Corporate Parenting plan which aims to:

- Be aspirational and ambitious in driving better outcomes for looked after children, young people and care leavers
- Identify and remove barriers to the wellbeing of looked after children, young people and care leavers
- Provide looked after children, young people and care leavers with opportunities to participate in activities designed to promote their wellbeing
- Track, assess and monitor the individual and collective needs of looked after children, young people and care leavers including parents and carers
- Through the delivery of agreed priority actions, improve the services and supports that are available and deliver on Our Pledges

- Ensure that there is pro-active engagement with looked after children, young people and care leavers in both individual care planning and strategic planning
- Monitor, evaluate and challenge the delivery of improved outcomes for looked after children, young people and care leavers to ensure continuous improvement.
- To take action continually to improve services and ensure it is responsive and meeting changing needs
- Ensure that all Elected Members are able to fulfil their role as corporate parents and consider training requirements / how all members can contribute to improving outcomes working collectively with our Young Persons Champion Board.

#### **Governance Arrangements**

The Corporate Parenting Group provides strategic direction and oversight and is accountable to the Children's Services Executive Group (CSEG).

For our Corporate Parenting Group, success will mean that we feel confident as Corporate Parents that we are working towards delivering on every Pledge within each action plan. It will also mean that we are able to evidence where we have taken into account the views, wishes and feelings of the young people in, and previously in, our care.

In addition to this Plan, the consultation and engagement with all children, young people and their families wherever possible in Dumfries and Galloway have the opportunity to actively participate and are supported to do so.

#### What We Will Do

This plan will be monitored at the Corporate Parenting Group Meetings. A performance report will be presented annually to provide the Group with data that informs on key areas together with comparison of Dumfries and Galloway data with that of comparator authorities and of Scotland. This annual report will also inform prioritisation of action-planning, redirection of resourcing, areas for further investigative work. Our Young Peoples Champion Board will be invited to attend meetings each year of the plan.

**Appendix 1** sets out our actions plans, setting out how we will deliver on this plan and will be regularly monitored and updated through the Corporate Parenting Group. The action plans span across the lifetime of this plan – emerging priority areas / activities may be added.

#### Appendix 1

#### HOUSING AND ACCOMMODATION ACTION PLAN

This action plan is one of four that supports our Corporate Parenting Plan 2021-2023 and provides the actions to be completed by Dumfries and Galloway Council and its key partners in their role as Corporate Parent during that period. The plan is in two parts – (1) Accommodation Priorities for Young People under 18 Years of Age; and (2) Accommodation Priorities for Young People over 16 Years of Age.

### **OUR PLEDGE**

- We will be confident that our services are as effective as they can be when they are shaped by the voices of children, young people and care leavers.
- We will ensure that all transitions from birth to young adulthood will be well planned and children and care leavers will experience safe, secure and stable placements, with as few moves as possible and to avoid homelessness and prevent homeless presentations.
- We will work with all young people who require accommodation to access and sustain the accommodation they choose and is available to meet their needs when they need it most.
- We will work with Housing providers to ensure there is a range of safe and comfortable accommodation choices to meet the needs of all young people at a time when they need this most for as long as they need this.
- We will ensure that a range of housing options will be available to vulnerable young people to access permanent accommodation options, or temporary accommodation if permanent is not immediately available, to meet their individual needs when they need this most to enable them to make a successful transition when they are ready to do so.

When developing this action plan, the five foundations of The Promise have been identified, to ensure these are at the heart of what we do, based on meeting the needs of those we serve, rather than the needs of our systems.

## Accommodation Priorities for Young People under 18 Years of Age

# INTERACTION WITH YOUNG PEOPLE ACTION PLAN

The following tables set out progress on each action against theme as set out in the Champions Board Action Plan, all actions were identified by the Listen2Us group. This plan will also inform one of four action plan that supports our Corporate Parenting Plan 2021-2023 and provides the actions to be completed by Dumfries and Galloway Council and its key partners in their role as Corporate Parent during that period. Where the operating context for proposals has changed this is noted in the narrative column and will be updated to Elected Members at Full Council later this year. The Themes are Family and Sibling Contact; Transport; Knowing Your Rights; Leaving Care; Going into Care; Stigma.

# **OUR PLEDGE** –

• We will ensure that our Looked After Children and Young People are given the same opportunities that any good parents would provide for their child, and that we have the same expectations and aspirations as we would for our own children.

When developing this action plan, the five foundations of The Promise have been identified, to ensure these are at the heart of what we do, based on meeting the needs of those we serve, rather than the needs of our systems.

Actions will be undertaken by current resource. Those actions where a financial implication has been identified – where currently able to, an estimated breakdown of cost has been identified in the narrative.

# THEME: FAMILY AND SIBLING CONTACT

#### RAISING ATTAINMENT IMPROVEMENT FOCUS FOR OUR LOOKED AFTER CHILDREN - ACTION PLAN

This action plan is one of four that supports our Corporate Parenting Plan 2021-2023 and provides the actions to be completed by Dumfries and Galloway Council and its key partners in their role as Corporate Parent during that period.

# **OUR PLEDGE**

- We will develop and promote the role of Corporate Parents for raising academic attainment and promoting wider attainment and participation
- We will contribute to Dumfries and Galloway's aspiration that young people will be in positive and sustained destination, and as part of the Young Person's Guarantee, support 100% of them to move into and sustain positive, meaningful destinations beyond school and be supported by appropriate training
- We will improve the educational attainment of care experienced children by removing barriers to learning, improving tracking and monitoring, improving attendance, reducing exclusion and providing equal access to opportunities
- We will develop, deliver and support intervention and prevention initiatives targeted at children and young people, aged between 0-26 to improve their wellbeing and attainment levels

When developing this action plan, each action has been aligned to the foundations of The Promise, to ensure these are at the heart of what we do, based on meeting the needs of those we serve, rather than the needs of our systems.

Actions will be undertaken by current resource (unless otherwise detailed).

#### IMPROVING ACCESS TO HEALTH FOR OUR LOOKED AFTER CHILDREN - ACTION PLAN

This action plan is one of four that supports our Corporate Parenting Plan 2021-2023 and provides the actions to be completed by Dumfries and Galloway Council and its key partners in their role as Corporate Parent during that period.

### **OUR PLEDGE**

- We will be confident that all children and young people who are looked after are invited to a health assessment within 4 weeks of the initial request and have a clear understanding for the reasons of this assessment what this will look and feel like to them.
- We will ensure that each individual health assessments meet the individual needs of all children and young people.
- We will increase the uptake of appointments by ensuring that children, young people and families understand the value for them as well as remove any barriers.

When developing this action plan, each action has been aligned to the foundations of The Promise, to ensure these are at the heart of what we do, based on meeting the needs of those we serve, rather than the needs of our systems.

Actions will be undertaken by current resource.
